Personal Profile

Results-oriented Full Stack developer committed to building a successful career in software development. Ability to deliver custom software solutions and update existing programs to refine components. Effective interpersonal skills: work well as part of a team with people at all organisational levels and diverse backgrounds. Equally successful working independently on time-sensitive projects and tasks. Looking to grow as part of a team and eventually take on responsibility for larger projects.

Key Skills & Achievement:

HTML / CSS / BOOTSTRAP / JAVA SCRIPT / REACT.JS / PYTHON / DJANGO / SQL /
RDBMS / PostgreSQL / GIT

Work Experience:

Full stack developer - Freelance

Nov 2023 - PRESENT

- **Frontend Development:** Proficient in HTML, CSS, JavaScript, and modern frameworks such as React.js, enabling the creation of visually stunning and responsive user interfaces.
- **Backend Development:** Using Python and Django for building robust server-side applications, ensuring seamless integration with databases for performance and reliability.
- **Version Control & Deployment:** Managing Git for version control and deployed applications on various platforms for efficient collaboration and scalable solutions.
- **Project Delivery & Optimization:** Proven ability to manage projects from start to finish, prioritising communication, bug resolution, and performance enhancements for timely delivery.
- **Adaptability and Communication:** Embraced emerging technologies to stay current in web development. Client-centric approach with strong communication skills.

Assistant Manager - Hilton

Sep 2018 - May 2024

- Delegating tasks to individual members of staff in the hotel
- Making quick reassignments to cover staff absenteeism
- Supervising the work of more than 10 housekeepers
- Holding meetings with staff to discuss their job functions

Customs Officer - Ukrainian State Customs Service

Apr 2016 - Mar 2018

- Inspecting cargo and personal belongings to ensure compliance with Ukrainian customs laws
- Detecting and preventing the smuggling of prohibited items, such as drugs, weapons, and illegal substances
- Calculating and collecting customs duties, taxes, and other fees on imported and exported goods
- Contributing to national security by monitoring and controlling the movement of goods and people across borders

Projects:

News Bot — News / Horoscope Bot for Telegram

Transforming news consumption by delivering summarised updates from top sources straight to your Telegram. Stay informed, ahead of the curve and entertained with personalised daily horoscopes for a touch of cosmic insight. It's news, simplified.

https://github.com/Rustam-Aliyev889/Telegram_News_Bot

Radiant Rituals — Ecommerce, Beauty products

My attempt to defy the black-and-white norm of ecommerce, showcasing that they can dynamically reflect a company's energy and personality.

<https://github.com/Rustam-Aliyev889/E-Commerce>

Trading Bot

Python-based automated trading system that utilises different indicators to make buy and sell decisions. The bot is designed to analyse real time data and make trading decisions based on predefined indicators.

https://github.com/Rustam-Aliyev889/Trading_Bot.git

Cinema+ — Movie App (React.js)

Explore popular movies across various genres and create your own watchlist, avoiding dependency on a single streaming platform.
