ABOUT ME

Self-motivated and solution-oriented full stack developer. Extremely passionate towards gaining new skills and further their implementation. Highly skilled in communication and collaboration. Seeking to join dynamic team where I utilize my skills to deliver high quality solutions.

EXPERIENCE/PROJECTS

Taskify

Technologies used (HTML CSS Bootstrap Python Flask RDBMS)

Task manager which is based on CRUD functionality. The app is aiming to help a team to manage their daily routine more effectively.

GitHub (https://github.com/Rustam-Aliyev889/taskify-2nd-att)

Quiz

Technologies used (HTML CSS JavaScript)

The project is a car related quiz. The goal of the quiz is to test your knowledge about cars in addition to find out want car you should be driving. :-)

GitHub (https://github.com/Rustam-Aliyev889/Quiz)

Love Maths

Technologies used (HTML CSS JavaScript)

This is a fully responsive JavaScript maths game where you given two numbers and you have to perform basic arithmetic operations(+ - * /) in your head.

GitHub (https://github.com/Rustam-Aliyev889/Love-Maths)

Thorin and company

Technologies used (HTML CSS JavaScript Python Flask)

Blog like website I have built to familiarize myself with basics of flask and python.

GitHub (https://github.com/Rustam-Aliyev889/thorin-flask-app)

Travelino

Technologies used (HTML CSS Bootstrap)

Travel agency website. It allows you to book a holiday or event. There is a contact page for visitors to the website to contact the agency .
