SQL / RDBMS / PostgreSQL / GIT / AWS

EXPERIENCE

Full Stack Developer - Freelance

OCTOBER 2023 - PRESENT

- **Frontend Development:** Proficient in HTML, CSS, JavaScript, and modern frameworks such as React.js, enabling the creation of visually stunning and responsive user interfaces.
- **Backend Development:** Using Python, Django and Flask for building robust server-side applications, ensuring seamless integration with databases for performance and reliability..
- **Version Control & Deployment:** Managing Git for version control and deployed applications on various platforms for efficient collaboration and scalable solutions.
- **Project Delivery & Optimization:** Proven ability to manage projects from start to finish, prioritizing communication, bug resolution, and performance enhancements for timely delivery.
- **Adaptability and Communication:** Embraced emerging technologies to stay current in web development. Client-centric approach with strong communication skills.

FEW OF MY PROJECTS

News Bot — *News / Horoscope Bot for Telegram*

Transforming news consumption by delivering summarized updates from top sources straight to your Telegram. Stay informed, ahead of the curve and entertained with personalized daily horoscopes for a touch of cosmic insight. It's news, simplified.

https://github.com/Rustam-Aliyev889/Telegram_News_Bot

Radiant Rituals — *Ecommerce, Beauty products*

My attempt to defy the black-and-white norm of ecommerce, showcasing that they can dynamically reflect a company's energy and personality.

https://github.com/Rustam-Aliyev889/E-Commerce

Cinema+ — *Movie App (React.js)*

Explore popular movies across various genres and create your own watchlist, avoiding dependency on single streaming platform.
